PROFILE SUMMARY

A software architect that strive for excellence at all times, while exemplifying value-based leadership, team work and continuous improvement in pursuit of organisational goals and national development.

SELECTED ACHIEVEMENTS

- Successfully led the team that developed a 360 degree feedback assessment software for a leading telecommunication firm; the results generated were used by the client to make administrative decision relating to pay and promotion.
- Worked with the Facebook and Testhaton team to understand how Africans consume content on the Facebook platform and making the mobile app data free and adaptable to the local audience.
- Saved my employer millions of naira in recurrent expenditure by getting a reliable vendor for the purchase and installation of some of our servers.
- Part of the team that managed and developed content for the Twitter platform of Nigeria's National Conference 2014, publishing 15,531 tweets and recording 140,698,161 impressions.

PROFESSIONAL SKILLS

- **I.T Skills:** Experienced in the use of OOP frameworks and databases which includes Anjular JS, RDBMS, HTML5, PHP5, MySQL, JQuery, Mongo DB, Laravel, SAP and social media engagement.
- **Teamwork and Leadership:** I have successfully led and coordinated various teams ranging from 8 – 43 people from different backgrounds.
- **Languages:** English (Full professional proficiency), Yoruba (native oral and written proficiency), Nupe and Hausa (Elementary proficiency)
- **Communication Skills:** I have displayed excellent oral and written communication skills in my roles as a team lead, instructor and a project manager.
